Forecast for Thursday 27 Apr 2023

Weather: A cloudy start to the day, with rain moving in from the southwest and spreading eastwards, turning heavy at times and carrying the risk of thunder. Rain turning generally lighter with drizzle into the evening, however some heavier bursts still possible by the end of the day. Breezier than recent days though milder.

Chance of cloud-free hill tops above 600m: 40% decreasing to 10% as rain and drizzle arrive from the southwest.

Low cloud and visibility: A cloudy day with cloud bases generally around 500-600m, although becoming more widespread and lowering to 300m in heavy rain and drizzle during the afternoon. Good visibility to start, but quickly deteriorating to poor or very poor in rain and drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Heavy or persistent rain may make surfaces slippery, and could lead to flooding on some paths, so be prepared with alternative routes. Take care as windy conditions will make for fairly arduous walking on exposed terrain with buffeting of clothing, and balance may be affected at times. Also, a combination of strong winds, low cloud and rain may give a significant wind chill, so extra clothing may be required.

Recent rainfall: measured at Neuadd: altitude 353m

02:00 on Thu 27 Apr 2023	0mm	0mm	9.8mm

Forecast for Friday 28 Apr 2023

Weather: Remaining rather cloudy to start with patchy rain and drizzle, this mainly confined to southern and western upslopes. Becoming drier with cloud gradually lifting and breaking up into the afternoon, leaving some sunny spells later. Winds easing through the afternoon.

Maximum wind: West to southwesterly, 35-40 mph with gusts up to 50 mph during the morning. Decreasing to 10-15 mph with gusts up to 20 mph by the evening.

Chance of cloud-free hill tops 600m: 10%, increasing to 80% by late afternoon.

Low cloud and visibility: Cloud bases generally around 500-600m, although possibly lowering to 300m in any rain or drizzle. Cloud lifting and breaking up, with bases above all summits by later afternoon. Generally good visibility, but poor to very poor in low cloud and precipitation during the morning.

Temperature: **Valleys:** Plus 9 Celsius, rising to Plus 16 Celsius.
At 600m: Plus 4 Celsius, rising to Plus 11 Celsius.
Freezing level: Above all summits.
